

# Product for Construction Industry

*adding value always*

# Product Name: Aluminum Foil Tape

## Product Description & Application

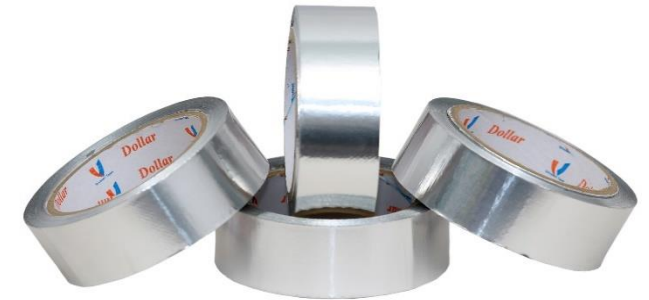

### Description & Features:

It is a high grade Aluminum Foil tape high tack, goods Adhesion, Excellent Reflective Properties and Waterproof.

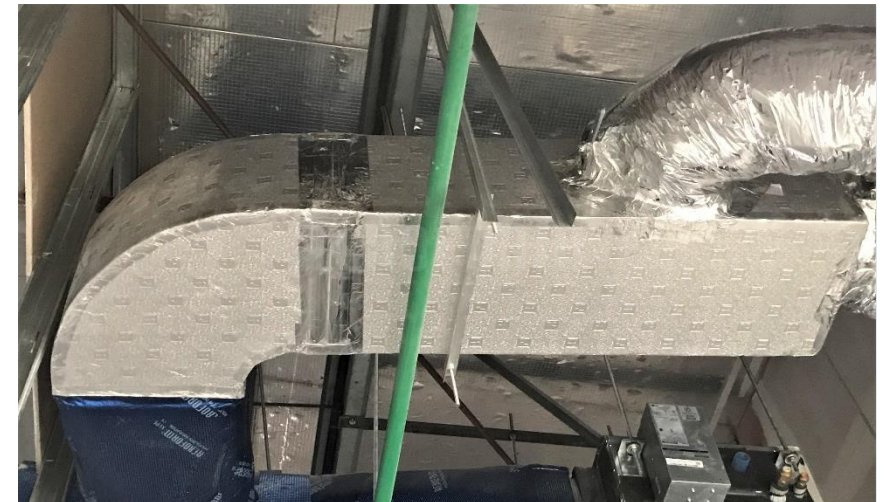

### Application:

Excellent for sealing joint and seams of foil faced insulation materials, HVAC application like , metal patching

# Product Name: Masking Tape

## Product Description & Application

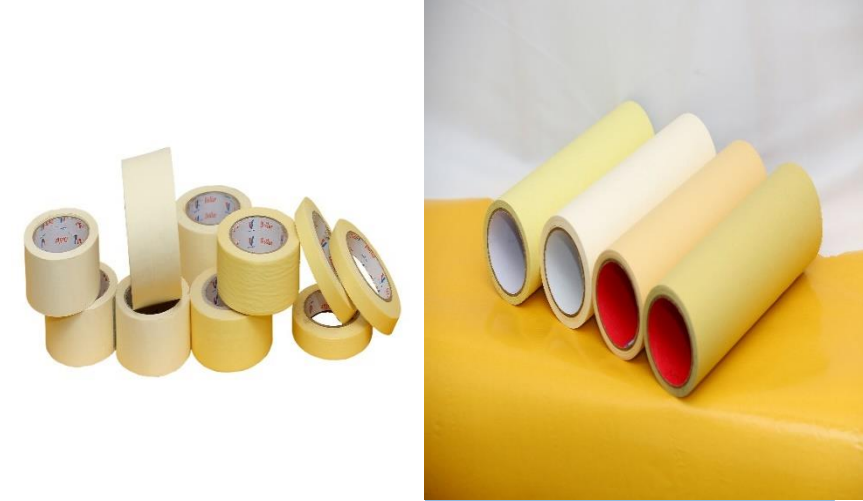

### Description & Features:

Crepe Paper Masking Tape Good Initial Tack Easy Masking and De-Masking  
Wet Resistant Masking Residue Free Removal

### Application:

Exterior, Interior and for Glazing Application, Painting Surface.

# Product Name: DUCT Tape

## Product Description & Application

### Description & Features:

High Resistance to Moisture, Excellent Immediate Bonding, High Tensile Strength, Long Life for Indoors and Outdoors, Seals and Protect Sensitive Surface from Dust and Moisture

### Application:

Duct Maintenance, cable Bonding, Moisture Proofing, Sealing and Holding Application

## Application Pictures

# Product Name: Fine Line Tape

## Product Description & Application

### Product Description:

Fine line tape is a light-adhesive masking tape used cover surfaces you don't want to be painted. Perfect on smooth surfaces such as over painting

### Application:

newly-painted woodwork, it protects trim, baseboards, moldings, casings and windows

## Application Pictures

# Product Name: DRYWALL Tape

## Product Description & Application

### Description:

Applying drywall tape helps bond together adjacent sheets of drywall. Doing this creates continuity and helps reduce any motion or cracking.

### Application:

reinforce joints, joint compound, conceal screws and nails

## Product Description & Application

Surface Protection Tape are used for temporary protection for most hard surface flooring and synthetic carpets and helps guard against tracked in dirt, paint spills, dust, construction debris and damage.

## Product Pictures

## Application Pictures

# Product Name: Surface Protection Tape

## Product Description & Application

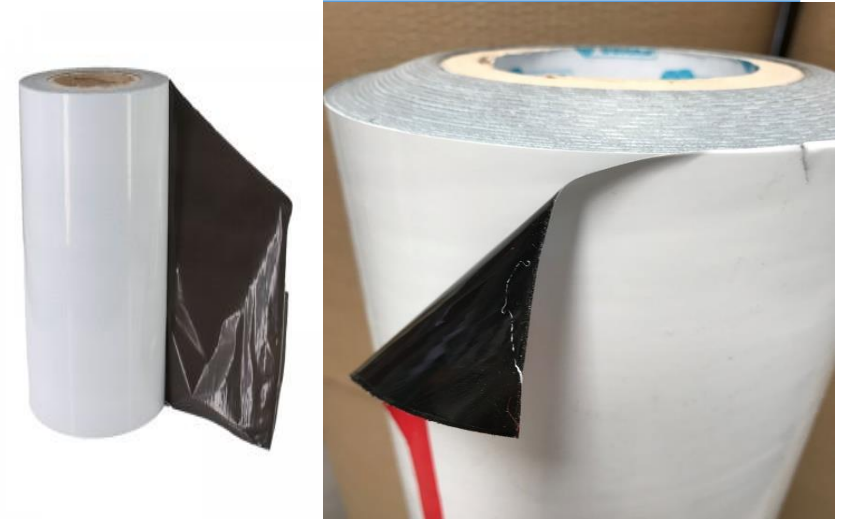

### Product Description:

- ❖ With stable and controlled adhesion throughout the transformation process and during storage.
- ❖ To preserve the quality and impeccable finish of your surfaces without leaving residues, stains or marking once the film is re-moved
- ❖ In order to reach the ideal adhesion level for laser cutting, it is advisable to wait 48 hrs after lamination.

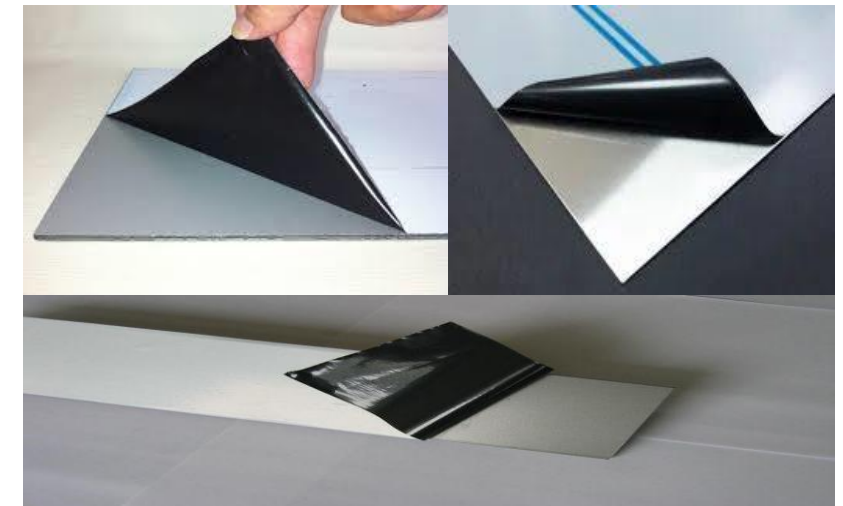

### Application:

- Stainless steel surface protection during Transformation and storage.
- Surface Protection Tape is designed for FRP, Painted and Mill Finished protection in auto motive industry.
- Product designed for LASER Fiber & LASER CO2 cutting.

# Product Name: BOPP-Packing Tape

## Product Description & Application

Adheres instantly to a variety of surfaces, Edge tear and split resistance, Good adhesion to fiberboard, Roll to roll consistency increases productivity for improved unit costs.

### Application:

Packing, Bundling, Masking, Edges Protection during lamination of HDPE/PP fabric,

# Product Name: Butyl Tape

## Product Description & Application

### Product Description:

It is a single and double sided butyl rubber adhesive tape which is used for water proofing, in all joints during construction and post construction. Totally water proof, good adhesion to all types of surface and can be planted over.

### Application:

Covering all cracks, Construction joints, Bends, Comer and Joints of non-homogeneous material before application of water proof membranes sealing all comers joints, Horizontal and vertical RCC Surface of the Sunken slabs of to nets

# Product Name: Solar Sil

## Product Description & Application

## Product Pictures

Solar-Sil445 is strong, non-corrosive, paintable (wet-on-wet), weather-resistant and resistant to UV rays. It is free of silicone, isocyanate, halogens and solvents. Solar-Flex is an elastic adhesive based on MS polymer specially developed for the solar industry. Both the very high initial bonding power and the fast development of adhesive strength enable bondings even on vertical surfaces. Replaces traditional fixings in the assembly of solar and photovoltaic power systems

# Product Name: XLPE Foam Tape

## Product Description & Application

### Product Description:

XLPE foam is an excellent material used as thermal & acoustics insulation

### Application:

pipe roofs insulation, wall insulation, floor insulation, and air duct insulation. It's the most popular roof insulation product.

# Product Name: Re-Bonded Foam Tape

## Product Description & Application

Rebond Foam is used for carpet padding, weight equipment, motorcycle seats, and other covered padding,

Rebonded foams are used as soundproof and noise dampening materials inside walls in constructional applications.  
Home Theater, Conference Room and Auditorium

# Product Name: Green Polyester Tape

## Product Description & Application

Flexible, wet resistant masking

- Tape with a good tensile strength.
- Residue free removal.
- Easy unwinding for better workability
- Good Initial tack
- Easy Masking and de-masking

Paint masking.

Masking gold fingers of printed masking circuit boards.

Holding application. Cable Bundling.

Masking during Powder coating/Epoxy coating

Insulation – with BDV of 4.5KV and temp resistance of 150Deg C.

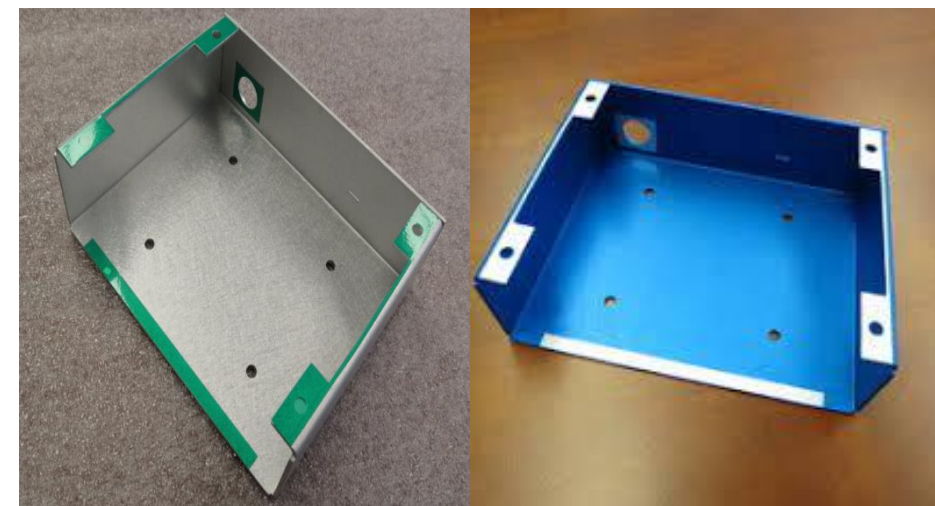

Flash breaker tape when pulling through cured coating, such as epoxies.

Holding and splicing difficult-to-stick-to surfaces, such as silicone liner.
